

KIRBY-SMITH MACHINERY, INC.

Design Build Program in Texas

PROJECT SUMMARY

Parkway Construction & Architecture has partnered with Kirby-Smith Machinery, Inc. (KSMI) to deliver multiple design-build projects aimed at expanding and enhancing KSMI's presence in Texas. Parkway provided comprehensive services from initial design through construction, ensuring each facility meets KSMI's operational needs and quality standards.

Chico, TX – Facility Remodel

Parkway guided KSMI through the remodeling of their existing facility in Chico.

Hewitt, TX – New Construction

Full site development and the construction of two structures: a 22,264-square-foot ground-up metal building housing office and shop areas, and an adjacent 2,500-square-foot metal building for wash-down operations on 16.5 acres.

Van Alstyne, TX – New Facility Development

Parkway is leading the design-build process for a new facility in Van Alstyne, encompassing site development on 14 acres and the construction of two metal buildings: one for office and shop areas, and an adjacent structure for wash-down operations.
